

ROMAN CHERNUKHA

Junior DevOps Engineer • Open to relocation within Europe

romanchernukha8@gmail.com | github.com/romanchernukha8-ctrl | linkedin.com/in/roman-chernukha-4052b63ba

Portfolio: romanchernukha8-ctrl.github.io/portfolio-v2

SUMMARY

Junior DevOps Engineer with 8 months of intensive, mentor-led hands-on training, building production-inspired Kubernetes microservices platforms (CI/CD, IaC, monitoring, centralized logging). Brings a 7-year background in industrial instrumentation and control at a thermal power plant, contributing strong troubleshooting discipline and experience working with safety-critical systems and technical documentation. Seeking a first professional role in DevOps in Europe.

TECHNICAL SKILLS

Cloud & IaC	AWS (EC2, IAM, VPC, RDS, ALB), Terraform
Containers	Docker, Docker Compose, Kubernetes, Helm
CI/CD	GitHub Actions, GitLab CI/CD, Self-Hosted Runner
Backend	Python, FastAPI, Flask, REST API, JWT
Databases	PostgreSQL, MySQL, SQLite, Redis
Monitoring	Prometheus, Grafana, Loki, Promtail
Infrastructure	Linux, Bash, Nginx, TCP/IP, DNS, Reverse Proxy
Messaging & AI	RabbitMQ, Ollama, SerpAPI

PERSONAL PROJECTS

AI File Analysis Platform — Personal Project

Production-inspired Kubernetes-based microservices platform for AI-powered document processing.

- Designed Kubernetes microservices architecture and deployed applications using Helm charts
- Built CI/CD pipelines with GitHub Actions
- Implemented JWT authentication and Redis caching
- Integrated RabbitMQ for asynchronous messaging between services
- Connected Ollama for AI-based document analysis
- Configured a full monitoring and logging stack: Prometheus, Grafana and Loki

Technologies: Kubernetes, Docker, Helm, Python, FastAPI, RabbitMQ, PostgreSQL, Redis, Ollama, GitHub Actions, Prometheus, Grafana, Loki

GitHub: github.com/romanchernukha8-ctrl/ai-file-analysis-platform

AWS Infrastructure with Terraform (Flask API) — Personal Project

Production-style AWS infrastructure provisioned with Terraform, serving a Flask API behind a load balancer.

- Provisioned AWS infrastructure using Terraform, including EC2, VPC, IAM and networking resources
- Deployed a Flask API behind an Application Load Balancer with Auto Scaling
- Connected the application to a PostgreSQL database on Amazon RDS
- Applied Infrastructure as Code principles using reusable Terraform modules

Technologies: Terraform, AWS, EC2, ALB, Auto Scaling, RDS, IAM, VPC, Flask

DevOps App — CI/CD with Automated Rollback — Personal Project

Dockerized application with load-balanced deployment and a self-healing CI/CD pipeline.

- Built a GitHub Actions CI/CD pipeline with automatic rollback triggered by health-check failures
- Configured Nginx load balancing across containerized application instances
- Containerized the full application stack with Docker

Technologies: Docker, Nginx, GitHub Actions, Health Checks, CI/CD

Flask Auth Platform — GitLab CI/CD to AWS — Personal Project

Authentication platform with a fully automated deployment pipeline to AWS.

- Built a Flask authentication service with JWT and session-based auth
- Containerized the app with Docker and served it behind Nginx
- Built a GitLab CI/CD pipeline with automated deployment to AWS EC2 via Bash and the GitLab API

Technologies: Flask, JWT, Docker, Nginx, GitLab CI/CD, Bash, AWS EC2

PROFESSIONAL EXPERIENCE

Instrumentation & Control Technician — Zmiiv Thermal Power Plant, Instrumentation & Control Department
2014 – 2021

- Performed maintenance and diagnostics of industrial instrumentation and automation systems
- Troubleshoot electrical and control equipment in a live industrial environment
- Worked with safety-critical industrial systems, following technical documentation and operational procedures

EDUCATION & TRAINING

DevOps Engineering — Individual Mentorship Program Nov 2025 – Present (8 months, ongoing)

Bachelor's Degree in Energy Engineering — Ukrainian Engineering Pedagogical Academy Sep 2017 – Jul 2022
Thesis defended remotely while relocated to Germany due to the war in Ukraine.

Vocational Diploma — Electrician, 4th Grade — Zmiiv Vocational-Technical Lyceum

LANGUAGES

- Ukrainian — Native
- Russian — Native
- English — Comfortable reading technical documentation and communicating in technical environments
